

Medical Equipment

United Case Solutions - Volume I

Medical Equipment Manufacturer

Manufacturer of high-end heart monitoring equipment needed returnable protective packaging.

Challenge:

Heart monitoring equipment can not fail. Our client needed packaging that would insure their equipment arrived at a patient's home in perfect operable condition. They also required packaging was durable enough to be used multiple times.

Solutions:

- 1) Custom designed foam inserts were fabricated to insure that each of the components in the monitoring set were available in the same returnable carton;
- 2) Cross-linked polyethylene foam was used to provide a washable surface for the returnable package inserts;
- 3) Three colors of cross-linked polyethylene foam were used to help patients follow written instructions on where to position the monitoring devices on their body.

About United Case

United Case, a UFP Technologies brand, is a full service provider of protective cases and custom engineered inserts. In partnership with United Foam, the flagship brand of UFP Technologies, United Case offers a wide variety of foam choices, multiple fabrication capabilities, and the protective packaging design knowledge required to provide the best case and foam insert solutions for your products.
